# CaberfixPro®

## Stick with the faster way

When it comes to saving time and money, **CaberfixPro** is the ideal solution. It requires just 5 mechanical fixings per board and can save an average builder up to 30 minutes per 50m<sup>2</sup> floor – not to mention time saved cleaning the floor at the end of the job.

The **CaberfixPro** sealing and fixing system comprises of Norbord's **Caberfix** T&G adhesive, a powerful PVA D3 glue and **Caberfix** Joint&Joist, a fast setting PU elastomeric adhesive for providing a structural bond between boards and joists. Also included is **Caberdek** Tape, a 100% waterproof polyethylene coated cloth tape.

Norbord's Caberdek flooring has long been the industry standard tongue and groove flooring material for new build housing. It makes sense to offer a recommended, manufacturer approved fixing range too, so you can provide a total flooring solution.

### Caberdek benefits

- ✓ Safe working platform – slip resistant film and assists with fall protection
- ✓ Withstands high site traffic – high resistance to impact and puncture
- ✓ The easily removed film – saves clean up costs and time
- ✓ Fully BBA approved – can be exposed for 42 days.
- ✓ 42db sound reduction when used in conjunction with leading I-beam manufactures

### CaberfixPro benefits

- ✓ The recommended way to install Caberdek flooring
- ✓ Fewer mechanical fixings (nails & screws)
- ✓ Produces a silent floor (no creaks and squeaks)
- ✓ Glue has shock & noise absorbing properties, will not crack under expansion or contraction
- ✓ System is widely used by national housebuilders

Each **CaberfixPro** pack contains the following:

- ✓ 1 x 1kg Caberfix T&G adhesive D3 PVA for T&G joints
- ✓ 7 x 310ml Caberfix Joint&Joist adhesive for joists
- ✓ 6 x 25m x 48mm rolls of Caberfix Tape
- ✓ Enough tape for all joint and nail runs as well as perimeter of 50m<sup>2</sup> floor.

1x pack of Caberdek  
100m<sup>2</sup>

2x CaberfixPro Kits  
50m<sup>2</sup>

= **PRO  
PACK**

NORBORD RECOMMENDS that **1x pack of Caberdek** (approx 100m<sup>2</sup>) is installed using **2x CaberfixPro kits**. Alternatively if you are putting down a lot of floors, then why not buy in bulk. All the contents of the **CaberfixPro** kit are available in larger component boxes, ask when placing your order.

**Available nationwide**
